HEYClip™ SunRunner® Cable Clips
Double-Compression, Straight-thru Design

Heyco’s SunRunner and SunRunner EZ’s robust “double-compression” design securely holds from (1) 12 gauge USE-2 to (2) 10 gauge PV-1000V solar wires.

Also for use with other cables from .20” (5,1 mm) to .30” (7,6 mm) in diameter.

Heyco SunRunner Clips are designed to provide a better method for PV module wire management and may be used wherever single or multiple cable management is needed.

Smooth clip edges prevent damage to cable insulation.

Locking tabs securely fasten clips to module extrusions, or other panels.

Generous lead in for installation without tools.

Screwdriver slot for easy removal or movement of clips if necessary.

Neatly dresses cables on PV panel frames or along mounting channels.

Constructed from corrosion resistant 304 stainless steel, not for use in a marine salt water environment.

316 stainless steel now available for marine and other harsh environments.

SunRunner EZ’s are designed for thicker module frames as well as racking – accommodates profiles up to .250” (6,4 mm) thick!

SunRunner 4 designed to hold up to (4) 12 gauge USE-2 or (4) 10 gauge PV-1000V solar wires.

SunRunner 4 is constructed from heat treated 410 stainless steel for excellent strength and corrosion protection for outdoor exposure.

DFARS Compliant.
